2007	>90%	1,2,3,4,5,6,7,8,9, earlier grants with carryover not listed

Notes on contract and grant support: Total support is not an exact percentage (to which I have access) because grants do not run in calendar years, support can change in given years, no-cost extensions can move support, and multiple departments can be involved in accounting. Future years are anticipated support (based on current grants). Total support for 2003-2006 is >90% per year (I was research track during that time), though the individual grant/contract details are unavailable. Details of individual contracts and grants (CGs) for 2007-Present are listed at the end of this document. 2016 includes 33% support for Associate Dean duties, and 2017/Present include 50% support for Associate Dean duties.

Notes on Contract/Grants

1. I do not always have access to the final grant, nor to the award. As such, titles may vary, and amounts may be unknown to me (when I am participating as a collaborator).
2. Whether all of the support budgeted for me in a given year is used or saved for a subsequent year is usually not communicated to me; it is handled by departmental administrative personnel.
